

ACXIOM

Master Template

VERSION 1.0

JANUARY 2026

Our template just leveled up.

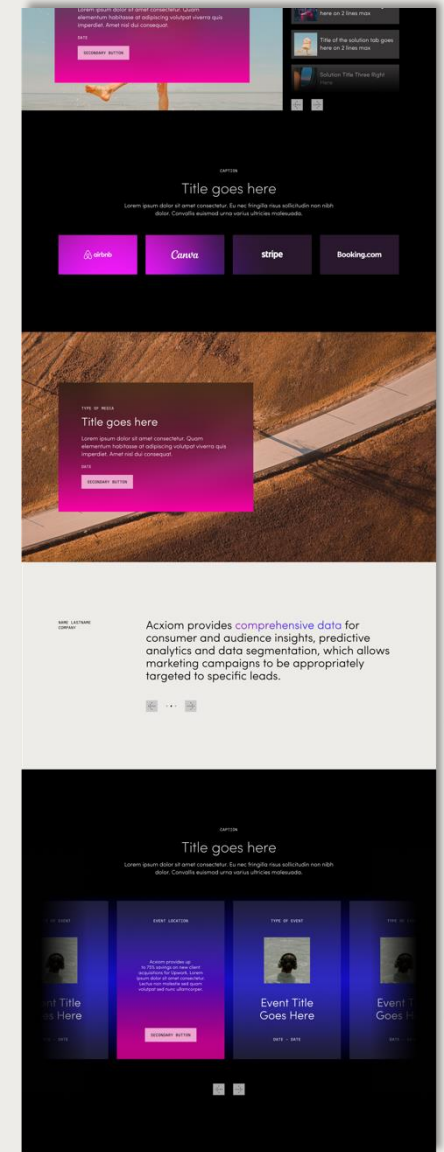

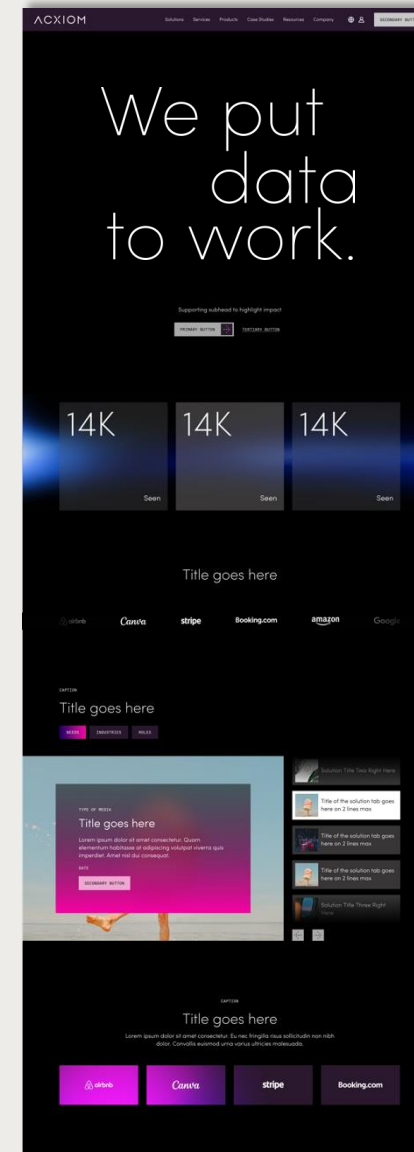

Where we're headed

ONE LOOK. ONE EXPERIENCE.

We've been working in the background on a new web experience—an iteration, not a rethink—to ensure a consistent Acxiom experience across every touchpoint.

The template is a new expression; the brand core remains the same. Built to align with the Omnicom Media story for one consistent client journey. This template reflects that thinking and our improved direction.

Full site launch coming in 2026.

Dos and don'ts

DO THIS :

Use this template for any new materials beginning XX, 2026.

Use the full 2026 or template OR the full 2025 template.

Use the fonts and font sizes embedded into the template. *Consolas* should always stay in all caps.

Use the colors pre-built into the color selection tools. For text, only use black and white.

Display *only* the Acxiom logo in the footer.

Use the standard, pre-selected slide transitions and animations.

Use the standard image compression.

NOT THIS :

No need to update non-mission critical decks into this template. The 2025 template is still “on brand,” this is just a different way of expressing ourself

Don't mix slides from the new and old templates. You can always check the year on the copyright line at the bottom of the slide to make sure what version you're using.

Don't use fonts that are currently not in the template. The only fonts you should be using are *TW Cen MT* and *Consolas*. Do not increase size of headlines or subheadings, only body text.

Don't use colors that aren't listed in the color selection tool or available through the presentation toolkit. Do not use colors for text.

Don't add client logos to the slide footers. Only display client logos on the cover slides where available.

Don't add slide transitions or complex animation.

Do not compress images.

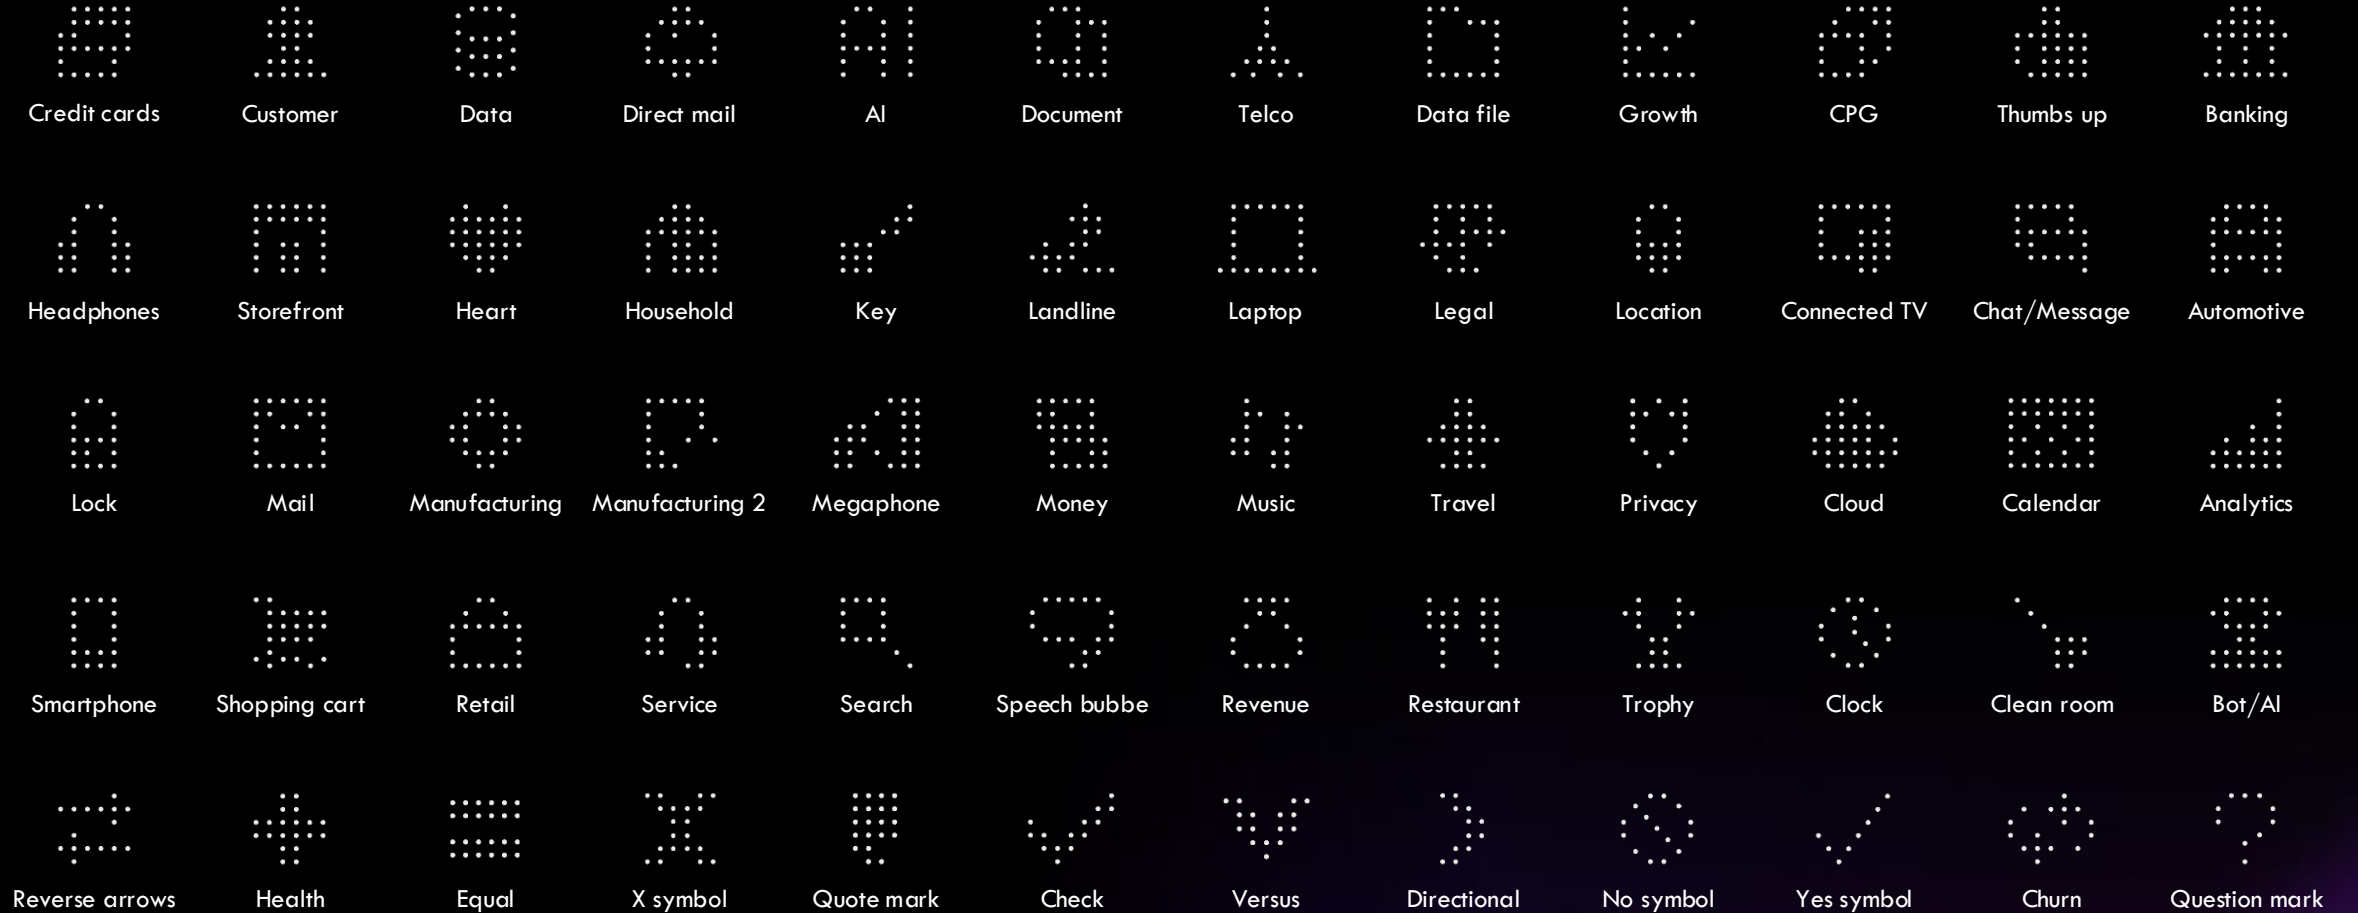

The presentation toolkit

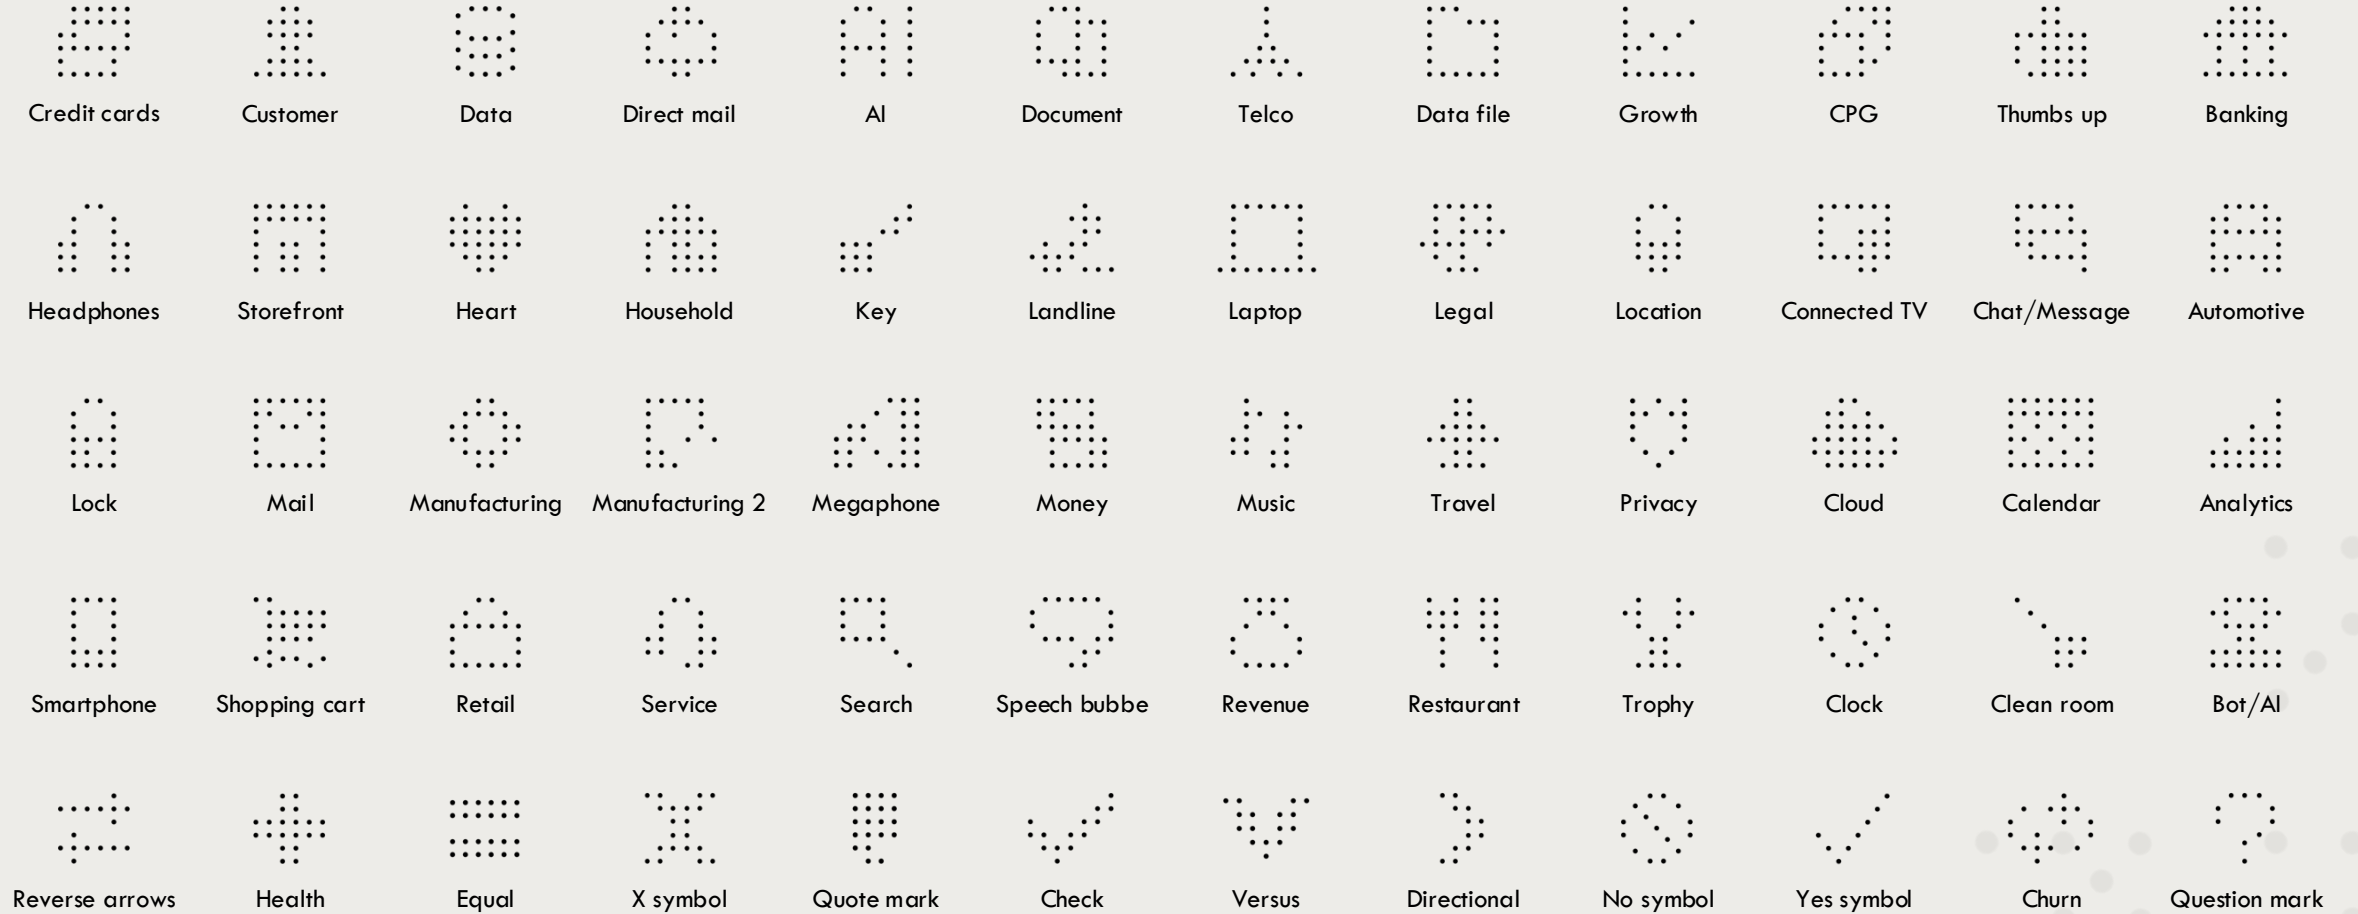

IN THIS SECTION

Use this toolkit to build presentations fast — with ready-made templates for charts, tables, diagrams, and more.

Photo glow

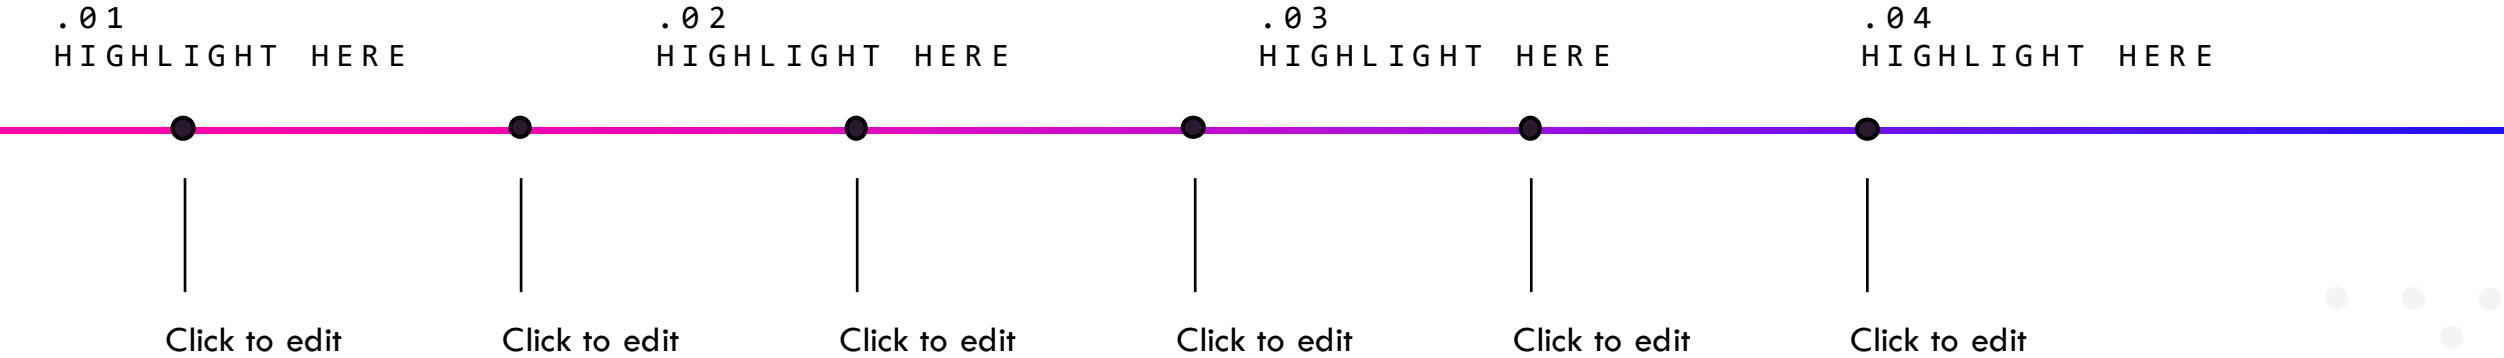

HOW TO USE

To use the photo glow effect, please copy and paste the glow on the right directly on top of your image.

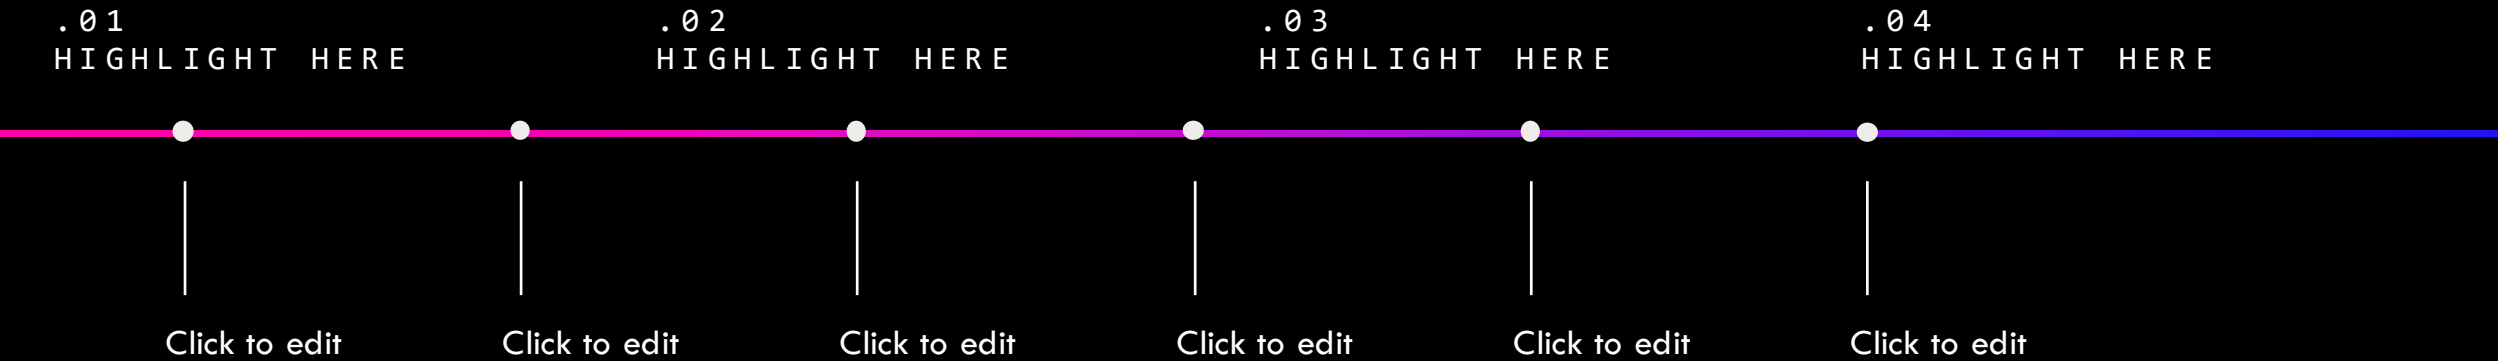

If your glow is over the logo, like in this layout, please also copy and paste the logo as well.

Helpful tips:

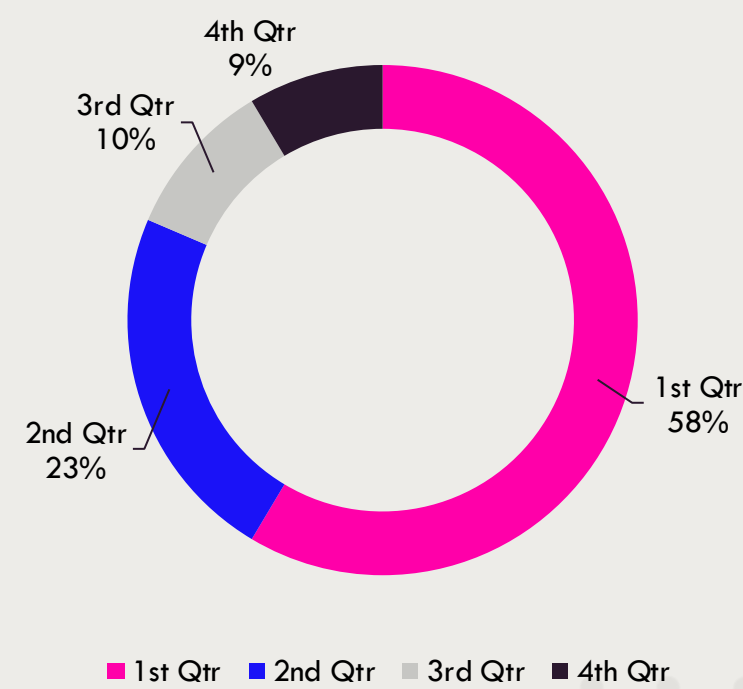

- To insert a column or row, right click on the cell either above or beside where you want to insert. Hover over “insert” and make your selection.
- To recolor a box, either click into the box you want to recolor or highlight over multiple boxes. Navigate to the “table design” tab on the top menu and choose “shading.”
- To merge cells, highlight cells and right click. Choose “merge cells.” The same applies to splitting them.

CASE STUDY / TRAVEL

THE CHALLENGE

Heathrow struggled with low customer satisfaction and missed revenue opportunities due to fragmented data, limited direct engagement, and challenges in personalizing traveler experiences and showcasing diverse offerings.

OUR APPROACH

Acxiom Professional Services helped Heathrow transition from Adobe to the Salesforce Marketing Stack, integrate third-party data to enhance data quality, and create a centralized hub that delivers a complete 360° view of the customer.

THE RESULTS

32%

email engagement improvement

30%

better customer ID accuracy

47%

digital revenue growth YoY

34%

growth in reactivated members
